FUND FACTSHEET

MARKETING COMMUNICATION (1)

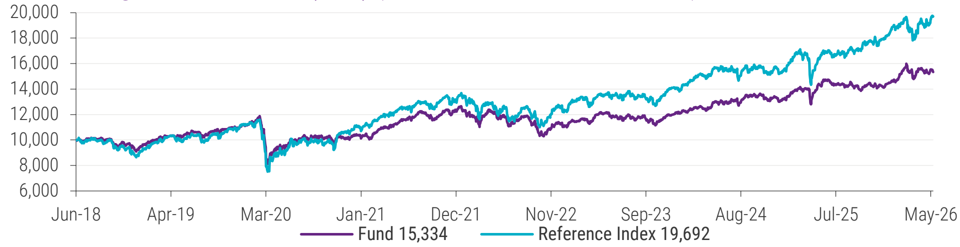
SHARE CLASS: N/A (EUR) - LU1118019592 May 2026

Fund highlights

• Aims to optimise the risk/return profile over the long term
• An innovative approach that focuses on risk reduction, including ESG risks, by investing in European stocks based on their low volatility and low correlation profiles
• Seeks to construct a diversified portfolio of stocks
• Provides a complementary solution to pure fundamental stock picking strategies
• This product promotes environmental or social characteristics but does not have as its objective a sustainable investment. It might invest partially in assets that have a sustainable objective, for instance qualified as sustainable according to the EU classification
• Minimum proportion of taxonomy alignment: 0%
• Minimum proportion of sustainable investments: 20%
• SFDR Classification: Art. 8

PERFORMANCE DATA SHOWN REPRESENTS PAST PERFORMANCE AND IS NOT A GUARANTEE OF FUTURE RESULTS.

Illustrative growth of 10,000 (EUR) (from 05/06/2018 to 29/05/2026)



The performance indicated for the fund before its inception, for the period from 30/09/2010 to 27/11/2013 is based on the historic performance of Seeyond Europe Minimum Variance, FCP collective investment fund under French law, registered with AMF, the financial market authority, and managed by the same management company using the same investment process. This performance has been adjusted to show the various charges applicable to the fund as accurately as possible.

RISK PROFILE

Lower risk Higher risk

1 2 **3** 4 5 6 7

The category of the summary risk indicator is based on historical data.

Due to its exposure to equity markets, the Fund may experience significant volatility, as expressed by its rank on the above scale.

The Fund investment policy exposes it primarily to the following risks:
- Risk of capital loss
- Changes in Laws and/or Tax Regimes
- Counterparty risk
- Equity securities
- ESG driven investments
- Exchange Rates
- Financial Derivative Instruments
- Geographic concentration risk
- Smaller Capitalization risk

The Fund is subject to sustainability risks.

For more information, please refer to the section detailing specific risks at the end of this document.

Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is based on the NAV (net asset value) of the share class, and is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), simulations can be carried out, for example, based on financial management assumptions. They do not constitute a contractual commitment on the part of the management company and do not engage its liability. The figures refer to simulations of past performance. Simulated past performance is not a reliable indicator of future performance.

Please read the important information given in the additional notes at the end of this document.

(1) Please refer to the prospectus of the fund and to the KID before making any final investment decisions.

Ostrum Europe MinVol Equity

ESG analysis as of 29/05/2026

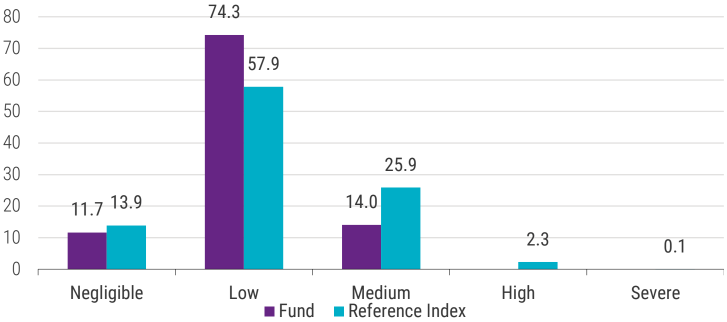
ESG Risk Categories

From lowest to highest risk

	Fund		Reference Index	
	Number of values	Weight (%)	Number of values	Weight (%)
Negligible	13	11.7	34	13.9
Low	80	74.3	229	57.9
Medium	17	14.0	121	25.9
High	0	-	12	2.3
Severe	0	-	1	0.1
Total	**110**	**100.0**	**397**	**100.0**

As some securities do not have an associated ESG risk category, the total may differ by 100%.
An ESG Risk category is assigned only to securities. Cash is excluded and weightings are therefore rebased on the market value of the equities only.

ESG Risk Categories (%)



Source : Sustainalytics

ESG Risk Category - Reading grid

Negligible: 0-9.99 Negligible financial impact of ESG issues on the portfolio	Low: 10-19.99 Low financial impact of ESG issues on the low portfolio	Medium: 20-29.99 Moderate financial impact of ESG issues on the moderate portfolio	High: 30-39.99 High financial impact of ESG issues on the high portfolio	Severe: > 40 Severe financial impact of ESG issues on the portfolio

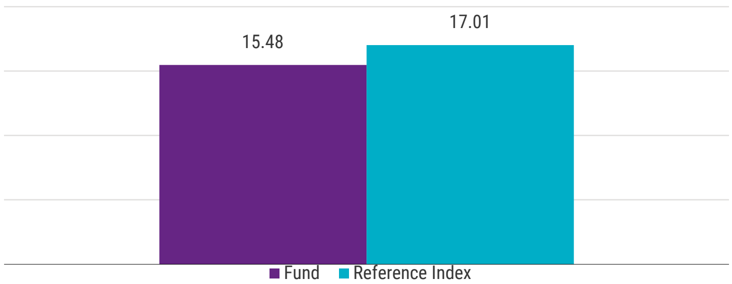
Each category captures a level of material financial impacts driven by ESG factors. The rating is rendered on a 0-100 scale, where lower scores are better, with 0 indicating that a company has no unmanaged ESG Risk.

ESG Risk Rating score

The lower the score, the lower the ESG risk

Fund	Reference Index
15.48	17.01

ESG Risk Rating score

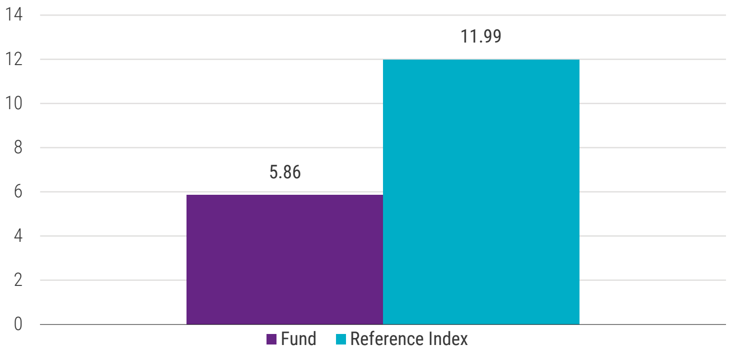


ESG risk ratings are interpreted as a measure of the unmanaged risk faced by companies, which could significantly impact their valuations. The lower a company's ESG risk rating, the lower its overall risk of a significant financial impact due to ESG factors. Sustainalytics' ESG risk ratings are made up of three basic elements which contribute to the overall score: Material ESG issues (or "MEI"), corporate governance and idiosyncratic issues.
The ESG risk rating is comprised of scores for 3 to 9 material ESG issues (out of a possible 20) and a corporate governance score. The indicators analysed on the various material ESG issues include (among others):

- carbon emissions, the use of resources such as water for the Environmental pillar,
- management of human capital through the company's training plans for the Social pillar and
- the quality of management and the integrity of the management committee for corporate governance.

These scores will have different weightings depending on the sub-sector of the company being assessed, as well as its specific risk exposure. Any controversies involving a company are also incorporated into the ESG risk rating so that its performance in the rating is as close as possible to reality. For more information on the methodology used, please get in touch with your usual contact person at Natixis Investment Managers or visit ESG Risk Ratings

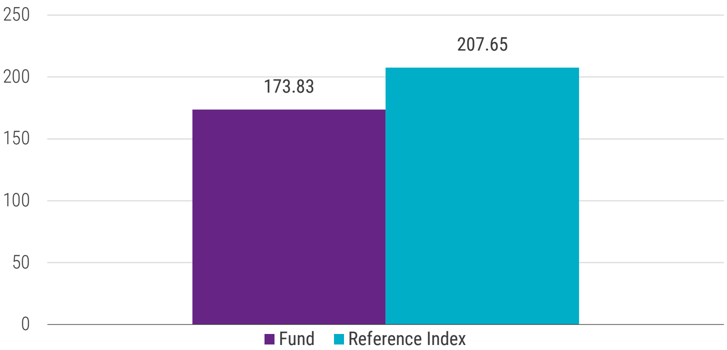
Carbon emissions (MTCO$_2$e) (Scope 1 & 2 & 3)



Coverage rate: 98 %

Carbon Emissions. Expressed in Million Tonnes CO2e (MtCO2e). Aggregated at the portfolio level, this metric is the weighted average of the 'carbon emissions' of the portfolio's emitters.

Carbon intensity (tCO$_2$e / USD M Sales) (Scope 1 & 2 & 3)



Coverage rate: 98 %

Carbon Intensity is the ratio between carbon emissions (Tonne CO2e) and the company's revenue (million USD). Aggregated at the portfolio level, this metric is the weighted average of the 'carbon intensities' of the portfolio's emitters.

DEFINITION

Type	Indicator	Definition
Corporates issuers	Trucost - S&P	- Scope 1 corresponds to emissions directly related to the activity of companies Examples: combustion of stationary and mobile sources, industrial processes excluding combustion, ruminant emissions, biogas from technical landfills, refrigerant leakage, nitrogen fertilization, biomasses. - Scope 2 refers to indirect emissions associated with the generation of electricity, heat or steam imported for the activities of the organisation. - Scope 3 corresponds to other greenhouse gas emissions related to the activities of a company but not the result of activities from assets directly owned or controlled by it. Scope 3 emissions therefore include several indirect sources of emissions in the company's supply chain.

Calculation of performance during periods of share class inactivity (if applicable)
For periods when certain share classes were unsubscribed or not yet created (the "inactive share classes"), performance is imputed using the actual performance of the fund's active share class which has been determined by the management company as having the closest characteristics to such inactive share class and adjusting it based on the difference in TERs and, where applicable, converting the net asset value of the active share class into the currency of quotation of the inactive share class. The quoted performance for such inactive share class is the result of an indicative calculation.

Illustrative Growth of 10,000
The graph compares the growth of 10,000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

Risk Measures
The "Summary Risk Indicator" (SRI), as defined by the PRIIPs regulation, is a risk measure based on both market risk and credit risk. It is based on the assumption that you stay invested in the fund for the recommended holding period. It is calculated periodically and may change over time. The indicator is presented on a numerical scale from 1 (the lowest risk) to 7 (the highest risk).
The risk measures below are calculated for funds with at least a three-year history.
Standard deviation is a statistical measure of the volatility of the fund's returns.
Tracking Error is reported as a standard deviation percentage difference between the performance of the portfolio and the performance of the reference index. The lower the Tracking Error, the more the fund performance resembles to the performance of its reference index.
The Sharpe ratio uses standard deviation and excess return to determine reward per unit of risk.
The Information Ratio is the difference between the fund's average annualized performance and the reference index divided by the standard deviation of the Tracking Error. The information ratio measures the portfolio manager's ability to generate excess returns relative to the reference index.
Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta). Alpha is often seen as a measure of the value added or subtracted by a portfolio manager.
Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market.
R-squared reflects the percentage of a fund's movements that are explained by movements in its benchmark index, showing the degree of correlation between the fund and the benchmark. This figure is also helpful in assessing how likely it is that alpha and beta are statistically significant.

Morningstar Rating and Category
 The Morningstar rating applies to funds having at least 3 years of history. It takes into account subscription fee, the yield without risk and the standard deviation to calculate for every fund its ratio MRAR (Morningstar Risk Adjust Return). Funds are then classified in decreasing order by MRAR: first 10 percent receive 5 stars, the following 22.5 percent 4 stars, the following 35 percent 3 stars, following 22.5 percent 2 stars, the last 10 percent receive 1 star. Funds are classified within 180 European categories.

Reference Index
The Sub-Fund is actively managed. The Reference Index is used for comparison purposes only. The Delegated Investment Manager remains free to choose the securities that make up the portfolio in accordance with the Sub-Fund's investment policy.

Asset allocation
Cash offset for Derivatives represents the amount of cash the portfolio manager should borrow if he is Long exposed via derivatives and vice versa. The weighting of the portfolio in various asset classes, including "Other," is shown in this table. "Other" includes security types that are not neatly classified in the other asset classes, such as convertible bonds and preferred stocks. In the table, allocation to the classes is shown for long positions, short positions, and net (long positions net of short) positions. These statistics summarize what the managers are buying and how they are positioning the portfolio. When short positions are captured in these portfolio statistics, investors get a more robust description of the funds' exposure and risk.

Fund Charges: The "Ongoing charges" are defined as the aggregate of Management Fees and Administration Fees paid annually by each Sub-Fund, other than taxes (such as "Taxe d'abonnement") and expenses relating to the creation or liquidation of any Sub-Fund or Share Class; the Ongoing charges shall not exceed such percentage of each Sub-Fund's average daily net asset value as indicated in each Sub-Fund's description under "Characteristics." The Ongoing charges paid by each Share Class, as indicated in each Sub-Fund's description, do not necessarily include all the expenses linked to the SICAV's investments (such as the taxe d'abonnement, brokerage fees, expenses linked to withholding tax reclaims) that are paid by such SICAV. Unless otherwise provided for in any Sub-Fund's description, if the yearly actual expenses paid by any Sub-Fund exceed the applicable Ongoing charges, the Management Company will support the difference and the corresponding income will be recorded under Management Company fees in the SICAV's audited annual report. If the yearly actual expenses paid by each Sub-Fund are lower than the applicable Ongoing charges, the Management Company will keep the difference and the corresponding charge will be recorded under Management Company fees in the SICAV's audited annual report.

Equity Portfolio Statistics (if applicable)
The referenced data elements below are a weighted average of the long equity holdings in the portfolio. The Price/Earnings ratio is a weighted average of the price/earnings ratios of the stocks in the underlying fund's portfolio. The P/E ratio of a stock is calculated by dividing the current price of the stock by its trailing 12-month earnings per share. The Price/Cash Flow ratio is a weighted average of the price/cash-flow ratios of the stocks in a fund's portfolio. Price/cash flow shows the ability of a business to generate cash and acts as a gauge of liquidity and solvency. The Price/Book ratio is a weighted average of the price/book ratios of all the stocks in the underlying fund's portfolio. The P/B ratio of a company is calculated by dividing the market price of its stock by the company's per-share book value. Stocks with negative book values are excluded from this calculation. Dividend Yield is the rate of return on an investment expressed as a percent. Yield is calculated by dividing the amount you receive annually in dividends or interest by the amount you spent to buy the investment.

Fixed-Income Portfolio Statistics (if applicable)
The referenced data elements below are a weighted average of the long fixed-income holdings in the portfolio. Duration measures the sensitivity of a fixed income security's price to changes in interest rates. Average maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each maturity date by the market value of the security. Modified Duration is inversely related to percentage change in price on an average for a specific change in yield. The average coupon corresponds to the individual coupon of each bond in the portfolio, weighted by the nominal amount of these very same securities. The average coupon is calculated only on fixed-rate bonds. The Yield to maturity (YTM) reflects the total return of a bond, if the bond is held until maturity, considering all the payments are reinvested at the same rate. This indicator can be calculated at the portfolio level, by weighting the individual YTM by the market value of each bond.

Performance fees
The performance fee applicable to a particular share class is calculated according to an indexed assets approach, i.e. based on a comparison of the valued assets of the UCITS and the reference assets, which serves as a basis for the calculation of the performance fee. The reference period, which corresponds to the period during which the performance of the UCITS is measured and compared to that of the reference index, is capped at five years. The management company shall ensure that, over a performance period of a maximum five years, any underperformance of the UCITS in relation to the reference index is compensated for before performance fees become payable. The start date of the reference period and starting value of the performance reference assets will be reset if underperformance has not been compensated for and ceases to be relevant as the five-year period elapses.

Special Risk Considerations
Risk of capital loss: the net asset value is likely to fluctuate widely because of the financial instruments that make up the Fund's portfolio. Under these conditions, the invested capital may not be fully returned, including for an investment made over the recommended investment period.
Changes in Laws and/or Tax Regimes: Each Fund is subject to the laws and tax regime of Luxembourg. The securities held by each Fund and their issuers will be subject to the laws and tax regimes of various other countries. Changes to any of those laws and tax regimes, or any tax treaty between Luxembourg and another country, could adversely affect the value of any Fund holding those securities.
Counterparty risk: The Fund uses over-the-counter derivatives and/or temporary sales and repurchases of securities. These transactions, undertaken with one or more eligible counterparties, potentially expose the Fund to the risk that one of its counterparties could fail, which could lead to a default in payment.
Equity securities: Equity securities are volatile and can decline significantly in response to broad market and economic conditions.
ESG driven investments: Environmental, social and governance ("Sustainable ESG") criteria are part of the investment policy. Sustainable ESG criteria aim to better manage risk, and generate sustainable, long-term returns. Applying Sustainable ESG criteria to the investment process may lead the Delegated Investment Manager to invest in or exclude securities for non-financial reasons, irrespective of market opportunities available if assessed while disregarding Sustainable ESG criteria.
Exchange Rates: Some Funds are invested in currencies other than their reference currency. Changes in foreign currency exchange rates will affect the value of those securities held by such Sub-Funds. For unhedged Share Classes denominated in currencies different than the Fund's currency, exchange rate fluctuations can generate additional volatility at the Share Class level.
Financial Derivative Instruments: Derivatives, such as options, futures and forward contracts, involves risk of loss and may entail additional risks. These include lack of liquidity, possible losses greater than the Fund's initial investment, increased transaction costs, and higher volatility. Option premiums paid for or received by the Fund are small relative to the market value of the investments underlying the options. This means that buying and selling put and call options can be more speculative than investing directly in the securities they represent. Under certain market conditions, the Fund could be forced to sell securities or to close derivative positions at a loss. Because derivatives depend on the performance of an underlying asset, they can be highly volatile and are subject to market and credit risks.
Geographic concentration risk: Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds invest may be significantly affected by adverse political, economic or regulatory developments.
Smaller Capitalization risk: Funds investing in companies with small capitalizations may be particularly sensitive to wider price fluctuations, certain market movements and less able to sell securities quickly and easily.
Sustainability risk: The Fund is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. More information on the framework related to the incorporation of sustainability risks can be found on the website of the Management Company and the Delegated Investment Manager.
Please refer to the full prospectus, for additional details on risks.

The fund is a sub-fund of Natixis International Funds (Lux) I which is organized as an investment company with variable capital under the laws of the Grand Duchy of Luxembourg and is authorized by the financial regulator (the CSSF) as a UCITS - 2-8 avenue Charles de Gaulle, L1653 Luxembourg - RCS Luxembourg B 53023.
Natixis Investment Managers International - a portfolio management company authorized by the Autorité des Marchés Financiers (French Financial Markets Authority - AMF) under no. GP 90-009, and a simplified joint-stock company (société par actions simplifiée – SAS) registered in the Paris Trade and Companies Register under no. 329 450 738. Registered office: 43 avenue Pierre Mendès France, 75013 Paris.
Ostrum Asset Management, a subsidiary of Natixis Investment Managers, is a French asset manager authorized by the Autorité des Marchés Financiers (Agreement No. GP18000014) and licensed to provide investment management services in the EU.

In Colombia: Provided by Natixis Investment Managers International Oficina de Representación (Colombia) to professional clients for informational purposes only as permitted under Decree 2555 of 2010. Any products, services or investments referred to herein are rendered exclusively outside of Colombia. This material does not constitute a public offering in Colombia and is addressed to less than 100 specifically identified investors.

In Chile: Esta oferta privada se inicia el día de la fecha de la presente comunicación. La presente oferta se acoge a la Norma de Carácter General N° 336 de la Superintendencia de Valores y Seguros de Chile. La presente oferta versa sobre valores no inscritos en el Registro de Valores o en el Registro de Valores Extranjeros que lleva la Superintendencia de Valores y Seguros, por lo que los valores sobre los cuales ésta versa, no están sujetos a su fiscalización. Que por tratarse de valores no inscritos, no existe la obligación por parte del emisor de entregar en Chile información pública respecto de estos valores. Estos valores no podrán ser objeto de oferta pública mientras no sean inscritos en el Registro de Valores correspondiente.

In Mexico: Provided by Natixis IM Mexico, S. de R.L. de C.V., which is not a regulated financial entity, securities intermediary, or an investment manager in terms of the Mexican Securities Market Law (Ley del Mercado de Valores) and is not registered with the Comisión Nacional Bancaria y de Valores (CNBV) or any other Mexican authority. Any products, services or investments referred to herein that require authorization or license are rendered exclusively outside of Mexico. While shares of certain ETFs may be listed in the Sistema Internacional de Cotizaciones (SIC), such listing does not represent a public offering of securities in Mexico, and therefore the accuracy of this information has not been confirmed by the CNBV. Natixis Investment Managers is an entity organized under the laws of France and is not authorized by or registered with the CNBV or any other Mexican authority. Any reference contained herein to "Investment Managers" is made to Natixis Investment Managers and/or any of its investment management subsidiaries, which are also not authorized by or registered with the CNBV or any other Mexican authority.

In Uruguay: Provided by Natixis IM Uruguay S.A.. Office: San Lucar 1491, Montevideo, Uruguay, CP 11500. The sale or offer of any units of a fund qualifies as a private placement pursuant to section 2 of Uruguayan law 18,627.

In Brazil: Provided to a specific identified investment professional for information purposes only by Natixis Investment Managers International. This communication cannot be distributed other than to the identified addressee. Further, this communication should not be construed as a public offer of any securities or any related financial instruments. Natixis Investment Managers International is a portfolio management company authorized by the Autorité des Marchés Financiers (French Financial Markets Authority - AMF) under no. GP 90-009, and a simplified joint-stock company (société par actions simplifiée – SAS) registered in the Paris Trade and Companies Register under no. 329 450 738. Registered office: 43 avenue Pierre Mendès France, 75013 Paris.

In the United States: Provided by Natixis Distribution, LLC, 888 Boylston St., Boston, MA 02199 for U.S. financial advisors who do business with investors who are not U.S. Persons (as that term is used in Regulation S under the Securities Act of 1933) or persons otherwise present in the U.S. It may not be redistributed to U.S. Persons or persons present in the U.S. Natixis Investment Managers includes all of the investment management and distribution entities affiliated with Natixis Distribution, LLC and Natixis Investment Managers International.

The above referenced entities are business development units of Natixis Investment Managers, the holding company of a diverse line-up of specialised investment management and distribution entities worldwide. The investment management subsidiaries of Natixis Investment Managers conduct any regulated activities only in and from the jurisdictions in which they are licensed or authorised. Their services and the products they manage are not available to all investors in all jurisdictions.

Although Natixis Investment Managers believes the information provided in this material to be reliable, including that from third party sources, it does not guarantee the accuracy, adequacy, or completeness of such information.

This document may contain references to copyrights, indexes and trademarks that may not be registered in all jurisdictions. Third party registrations are the property of their respective owners and are not affiliated with Natixis Investment Managers or any of its related or affiliated companies. Such third-party owners do not sponsor, endorse or participate in the provision of any Natixis Investment Managers services, funds or other financial products.

The index information contained herein is derived from third parties and is provided on an "as is" basis. The user of this information assumes the entire risk of use of this information. Each of the third party entities involved in compiling, computing or creating index information, disclaims all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to such information.
The provision of this material and/or reference to specific securities, sectors, or markets within this material does not constitute investment advice, or a recommendation or an offer to buy or to sell any security, or an offer of any regulated financial activity. Investors should consider the investment objectives, risks and expenses of any investment carefully before investing. The analyses, opinions, and certain of the investment themes and processes referenced herein represent the views of the individual(s) as of the date indicated. These, as well as the portfolio holdings and characteristics shown, are subject to change and cannot be construed as having any contractual value. There can be no assurance that developments will transpire as may be forecasted in this material. The analyses and opinions expressed by external third parties are independent and does not necessarily reflect those of Natixis Investment Managers. Any past performance information presented is not indicative of future performance.

This material may not be redistributed, published, or reproduced, in whole or in part.

All amounts shown are expressed in EUR unless otherwise indicated.

Natixis Investment Managers may decide to terminate its marketing arrangements for this fund in accordance with the relevant legislation.
